

At this time in our world there are more problems going on with people being killed from other countys to think the fcc would be trying to stop trafic and weather be brodcast over xm I think this is a wast of there time and should pay more attention to whats going on with the FBI or other Gov. personal and to help find a way to get word out to us the people of the USA when where in danger from other countys.  
In short let XM keep brodcasting the weather and trafffic.

Thanks
